# CARE AND MAINTENANCE

## PRODUCT CARE FOR HI-GLOSS ITEMS

- Hi-gloss lacquered furniture is more sensitive to marks and scratching than some other furniture products. It is important to exercise caution and care to maximise the life and beauty of this product
- Following the below simple guidelines when using your hi-gloss product will protect your investment for years to come
- Dust frequently with a clean damp lint-free cloth. This will help remove abrasive build up which can damage a finish over time
- Avoid using chemicals or solvents when cleaning the product
- Do not place hot objects on any furniture surface. Always use a hot plate or placemat. Lacquer finishes provide added scratch and heat resistance to our furniture, but they can still be damaged without proper care
- Avoid exposing your furniture to strong sunlight, heat outlet, open windows or dampness. Prolonged exposure to direct sunlight can fade the finish of your furniture, while extreme temperature and humidity changes can cause cracking or splitting
- Do not expose your furniture to any liquids. Never allow water to sit on your furniture. Alcohol, nail polish and perfume are also dangerous as they will dissolve the lacquer finish on contact and may require professional repairs
- Do not allow plastic to come in direct contact with your furniture. Chemicals in the plastic of placemats etc. may soften and mark the finish if left in contact with the furniture for a period of time
- Avoid placing sharp or rough objects on the surface of your furniture. These may scratch the surface of the product
- When moving your furniture, do not drag it across the floor. This may damage the product. Instead use two (2) people to lift carefully from either end
