SAFETY BRACKETS INSTRUCTIONS

1. Attach one bracket to the wall, with the long screws as shown. Make sure to attach the bracket into a stud. If mounting onto brick or masonry, you will need to acquire wall anchors.
2. Attach a bracket to the furniture frame under the top with the short screws provided.
3. Move the furniture into its final position. Thread a strap through the bracket as shown in the illustration, tighten strap until snug. Do not over tighten.
4. Make sure the bracket is firmly attached to the wallboard and furniture, and the strap is snug.

ASSEMBLY IS COMPLETE

Care label for timber items

- A multi-step finish is applied to all our furniture, but all wood comes from nature. Because of this, there will be natural variations in surface texture and grain like knots, mineral streaks and sap runs that may affect the finish. These differences in character are not defects, but distinctions that make each piece of furniture unique.
- Our furniture is built to last. Following these steps for basic care should protect your investment for years to come.
- Dust frequently with a clean damp lint-free cloth. This will help remove abrasive build up which can damage a finish over time.
- Do not place hot objects on any furniture surface. Always use a hot plate or placemat. Laminate and lacquer finishes on table tops provide added scratch and heat resistance to our furniture, but they can still be damaged without proper care.
- Avoid exposing your furniture to strong sunlight, heat outlet, open windows or dampness. Prolonged exposure to direct sunlight can fade the finish of your furniture, while extreme temperature and humidity changes can cause cracking or splitting.
- Do not expose your furniture to any liquids. Never allow water to sit on your furniture. Alcohol, nail polish and perfume are also dangerous as they will dissolve the lacquer finish on contact and may require professional repairs.
- Do not allow plastic to come in direct contact with your furniture. Chemicals in the plastic of placemats etc may soften and mark the finish if left in contact with the furniture for a period of time.
