PRE-ASSEMBLY PREPARATION

Before you start:

1. Choose a clean, level, spacious assembly area. Avoid hard surfaces that may damage the product.
2. Take care when lifting. Product should be assembled as near as possible to the point of use.
3. Ensure that you have all required contents for complete assembly.
4. Always read the assembly instructions carefully before beginning assembly.
5. Keep all hardware parts and packaging out of reach of small children.
6. Do not over tighten the screws and bolts as this may damage the threads.

PARTS LIST

1 Table Top 1PC 	2 Legs 4PCS 
3 Glass 1PC 	

A. Bolt  M6*20*8PCS	B. Bolt  M8*50*8PCS	C. Washer  M6*8PCS	D. Washer  M8*8PCS
E. Spring Washer  M8*8PCS	F. Allen Key  M6*1PC	G. Wrench  M8*1PC	

Step 1:

ITEMS REQUIRED

1	Table Top	1PC	2.	Legs	4PCS
					
A.	Bolt		C.	Washer	
					
M6*20*8PCS		M6*8PCS		M6*1PC	

- Attach legs (2) to table top (1) using bolt (A) with washer (C).
- Insert all bolts before fully tightening .
- Tighten with allen key (F) .

Step 2:

ITEMS REQUIRED

B. Bolt  M8*50*8PCS	D. Washer  M8*8PCS	E. Spring Washer  M8*8PCS
G. Wrench  M8*1PC		

- Attach legs (2) to table top (1) using bolt (B) , washer (D) and spring washer (E).
- Tighten with wrench (G) and allen key (F).

IMPORTANT NOTE:
ALWAYS USE TWO PEOPLE WHEN TURNING THE TABLE OVER

Step 3:

ITEMS REQUIRED

- Turn over the table frame.
- Place glass (3) on the top of the table.
- Glass is secured on the table with suckers.

ASSEMBLY IS COMPLETE

CAUTION:

ALWAYS LIFT YOUR PRODUCT WHEN MOVING/RELOCATING.

DO NOT DRAG. DRAGGING CAN CAUSE DAMAGE TO THE LEGS

Care and maintenance

Aluminium

To ensure the longevity and maintain the appearance of your aluminium outdoor furniture, please follow these care instructions:

1.Usage and Storage:

This item is designed for outdoor use, but, like all man-made materials, it can suffer damage if left exposed to the elements. To extend its life, avoid prolonged exposure to weather conditions. Store the furniture indoors or under cover when not in use or use an outdoor cover (do not store on grass).

2.Avoid Excess Moisture:

DO NOT allow the furniture to remain wet or sit in standing water for long periods. Wipe the furniture dry immediately if it becomes wet. Excess moisture can cause corrosion.

3.Avoid exposure to chlorine & salt water:

Chlorine/salt can disrupt the protective oxide layer on aluminium, leading to accelerated corrosion. This is particularly problematic in environments with high chlorine concentrations, such as in swimming pools, homes within a short distance of the ocean or areas with heavy chlorination.

4.Cleaning:

Clean your furniture with care. Avoid using harsh solvents, abrasives, or chemicals. To remove dirt and grime, rinse with fresh water and dry thoroughly. For a deeper clean, use a sponge and a mild detergent solution as needed. Abrasive cleaners will scratch/damage the surface.

Live by the beach? Due to a process called “aerosolization”, sea water is broken up into tiny droplets by the wind and waves and salt particles are released into the air. This process accelerates the corrosion of metal surfaces over time. It is essential to use furniture covers when the product is not in use and clean your product more frequently.

By following these simple steps, you will help keep your furniture in great condition and ensure it remains a beautiful and functional part of your outdoor space.

Care and maintenance

Glass

To ensure the safety and longevity of your glass furniture, please follow these important care instructions:

1.Usage and Storage:

This item is designed for outdoor use, but, like all man-made materials, it can suffer damage if left exposed to the elements. To extend its life, avoid prolonged exposure to weather conditions. Store the furniture indoors or under cover when not in use or use an outdoor cover.

2.Inspect Upon Delivery:

If you notice that the glass is chipped or broken upon delivery, stop using the product immediately and contact Amart for assistance.

3.Inspect regularly:

If you notice that the glass is chipped or broken over its lifespan, stop using the product immediately as this may result in a sudden and premature cracking of the surface.

4.Avoid Impact:

Do not drop, drag, or strike the glass surface. Handle with care to avoid any damage.

5.Safe Usage:

Do not sit or stand on the glass surface. It is designed for use as a tabletop and is not designed to support weight.

6.Temperature Precautions:

Avoid placing very hot or very cold items directly on the glass. Use at least 6mm thick table mats or protective pads to prevent extreme temperatures from coming into direct contact with the glass.

7.Scratches:

Do not use the glass surface as a chopping board or allow it to come into contact with sharp or abrasive objects as this can cause scratches.

Cleaning:

Clean your furniture with care. Avoid using harsh solvents, abrasives, or chemicals. To remove dirt and grime, rinse with fresh water and dry thoroughly. For a deeper clean, use a sponge and a mild detergent solution as needed. Abrasive cleaners will scratch/damage the surface.

Care and maintenance

Exploding glass

"Exploding glass" refers to the phenomenon where glass suddenly shatters or breaks apart, often with a lot of force or in a dramatic fashion. There are several causes for this issue:

1.Thermal Stress:

Glass can break due to rapid changes in temperature. For example, if a hot object is placed on a cold glass surface, or if the glass is exposed to extreme heat or cold, it can expand or contract unevenly, causing it to crack or shatter.

2.Impact Damage:

Dropping or striking glass with a hard object can cause it to crack or break. Even a small impact can lead to a chain reaction of fractures, making the glass appear to "explode."

3.Unlevel surface: The uneven glass surface causes uneven stress distribution, making it more prone to breakage and fragmentation under pressure or impact, posing a danger to surrounding people and objects. For example, when a person leans on a glass partition with an uneven surface, the glass may break due to excessive local stress.

4.Chemical Reactions: Some types of glass can be sensitive to certain chemicals. Exposure to harsh chemicals or cleaning agents might weaken the glass over time, leading to sudden breakage.

If glass "explodes" or shatters, it is important to handle the situation carefully to avoid injury. Broken glass should be cleaned up promptly.

When choosing protective matting for your tabletop, consider the below:

1.Material:

Choose placemats made from materials that offer good insulation against heat, such as silicone, cork, or thick fabric. The thickness of this material should be a minimum of 6mm. These materials are effective at absorbing and diffusing heat.

2.Coverage:

Ensure that the placemat is large enough to cover the area where hot items will be placed. It should completely cover the base of pots, pans, or other hot items to provide adequate protection.

3.Heat Resistance:

Verify that the placemat is designed to handle high temperatures. Some placemats are specifically rated for heat resistance and can withstand higher temperatures without damage.

By following these simple steps, you will help keep your furniture in great condition and ensure it remains a beautiful and functional part of your outdoor space.
