

ASSEMBLY INSTRUCTION

GARDENIA

3 PIECE OUTDOOR SETTING

ITEM CODE 85630

Imported by JWA Furniture Pty Ltd, Brisbane, QLD, Australia
For any assistance with assembly or for missing parts, please refer to your receipt

PRE-ASSEMBLY PREPARATION

Before you start:

- 1. Choose a clean, level, spacious assembly area. Avoid hard surfaces that may damage the product.
- 2. Take care when lifting. Product should be assembled as near as possible to the point of use.
- 3. Ensure that you have all required contents for complete assembly.
- 4. Always read the assembly instructions carefully before beginning assembly.
- 5. Keep all hardware parts and packaging out of reach of small children.
- 6. Do not over tighten the screws and bolts as this may damage the threads.
- 7. Assembly is to be carried out by a competent adult(s) ONLY
- 8. During assembly, children should be kept away from the product due to possible risk to injury.
- 9. Do not use this item if any components are missing or damaged.
- 10. Please keep the instructions for future reference.

		
Allow 60min	For 2 person	You will need a tape measure.

PARTS LIST

1.	Table Top	1PC	2.	Legs	4PCS
					
3.	Fixed Link	2PCS			
					

A.	Bolt	B.	Washer	C.	Allen Key
					
M6*40 , 8PCS		M6 , 8PCS		M6 , 1PC	

PARTS LIST

1.	Backrest		1PC	2.	Rear Leg		2PC
3.	U-shaped Support Bar		1PC	4.	Seat Support Bar		1PC
5.	Front Leg		1PC	6.	Seat Panel		1PC

A. Bolt  M6*25 , 2PCS	B. Bolt  M6*28 , 2PCS	C. Bolt  M6*40 , 2PCS	D. Bolt  M6*45 , 2PCS
E. Screw  Φ5x20 , 4PCS	F. Nut  M6 , 8PCS	G. Allen Key  M6 , 1PC	H. Wrench  M6 , 1PC

Part A: Table

You will need the following

1.	Table Top	1PC	2.	Legs	4PCS
					

Step 1:

- Align holes in table top (1) over threads in table legs (2).

Part A: Table

You will need the following

Step 2:

NOTES:

- Once the table legs are inserted, some slight adjustments may need to be made in order for the legs to be able to attach to the leg connector bracket .
- This is done by gently repositioning the plastic housings in which the table legs screw in to .
- You can reposition the housings by gently tapping them with a rubber mallet or a similar soft surfaced tool.
- DO NOT USE A METAL HAMMER AS THIS MAY DAMAGE THE HOUSINGS.

Part A: Table

You will need the following

A.	Bolt	B.	Washer	C.	Allen Key
					
	M6*40*8PCS		M6*8PCS		M6*1PC

Step 3:

- Attach fixed link (3) to legs (2) using bolt (A) with washer (B) .
- Insert all bolts before fully tightening .
- Tighten with allen key (C) .

ASSEMBLY IS COMPLETE

Part B: Single Chair

You will need the following

Step 1:

- Connect backrest (1) and front leg (5).

Part B: Single Chair

You will need the following

2. Rear Leg 2PCS	4. Seat Support Bar 1PC		
			
B. Bolt	F. Nut	G. Allen Key	H. Wrench
			
M6*28 , 2PCS	M6 , 2PCS	M6 , 1PC	M6 , 1PC

Step 2:

- Use screw (B) and nut (F) to connect rear leg (2) and seat support bar(4).
- Insert all bolts before fully tightening .
- Tighten with allen key (G) and wrench (H) .

Part B: Single Chair

You will need the following

D.	Bolt	F.	Nut	G.	Allen Key	H.	Wrench
							
M6*45 , 2PCS		M6 , 2PCS		M6 , 1PC		M6 , 1PC	

Step 3:

- Use screw (D) and nut (F) to connect seat support bar (4) and front leg (5).
- Insert all bolts before fully tightening .
- Tighten with allen key (G) and wrench (H) .

Part B: Single Chair

You will need the following

3. U-shaped Support Bar 1PC 	A. Bolt  M6*25 , 2PCS		
C. Bolt  M6*40 , 2PCS	F. Nut  M6 , 4PCS	G. Allen Key  M6 , 1PC	H. Wrench  M6 , 1PC

Step 4:

- Use screw (A) and nut (F) to connect backrest (1) and u-shaped support bar (3).
- Pay attention to installing u-shaped support bar (3) behind the iron sheet of backrest (1).
- Use screw (C) and nut (F) to connect u-shaped support bar (3) and seat support bar (4) .
- Fully tighten all bolts with allen key (G) and wrench (H) .

Part B: Single Chair

You will need the following

Step 5:

- Put seat panel (6) on the assembled frame (STEP 4).

Part B: Single Chair

You will need the following

E.	Screw	G.	Allen Key
			
$\Phi 5 \times 20$, 4PCS		M6 , 1PC	

Step 6:

- Flip the chair 180 degrees and place it on the ground.
- Use screw (E) to connect seat panel (6), backrest (1) and seat support bar (4).
- Tighten with allen key (G).

ASSEMBLY IS COMPLETE

PRODUCT CARE:

Metal

To ensure the longevity and maintain the appearance of your steel outdoor furniture, please follow these care instructions:

1. Usage and Storage:

Galvanised steel is designed for short term outdoor use due to its protective zinc coating, but, like all man-made materials, it can suffer damage if left exposed to the elements. To extend its life, avoid prolonged exposure to weather conditions. Store the furniture indoors or under cover when not in use or use an outdoor cover (do not store on grass).

2. Avoid Excess Moisture:

DO NOT allow the furniture to remain wet or sit in standing water for long periods. Wipe the furniture dry immediately if it becomes wet. Excess moisture can compromise the protective coating and lead to rust formation.

3. Avoid exposure to chlorine & salt water:

Chlorine/salt can disrupt the protective zinc oxide layer on steel, leading to accelerated corrosion. Once the protective layer is compromised it more susceptible to rust. This is particularly problematic in environments with high chlorine concentrations, such as in swimming pools, homes within a short distance of the ocean or areas with heavy chlorination.

4. Cleaning:

Clean your furniture with care. Avoid using harsh solvents, abrasives, or chemicals. To remove dirt and grime, rinse with fresh water and dry thoroughly. For a deeper clean, use a sponge and a mild detergent solution as needed. Abrasive cleaners will scratch/damage the surface.

Live by the beach? Due to a process called “aerosolisation”, sea water is broken up into tiny droplets by the wind and waves and salt particles are released into the air. This process accelerates the corrosion of metal surfaces over time. It is essential to use furniture covers when the product is not in use and clean your product more frequently.

By following these simple steps, you will help keep your furniture in great condition and ensure it remains a beautiful and functional part of your outdoor space.

PRODUCT CARE:

Glass

To ensure the safety and longevity of your glass furniture, please follow these important care instructions:

1.Usage and Storage:

This item is designed for outdoor use, but, like all man-made materials, it can suffer damage if left exposed to the elements. To extend its life, avoid prolonged exposure to weather conditions. Store the furniture indoors or under cover when not in use or use an outdoor cover.

2.Inspect Upon Delivery:

If you notice that the glass is chipped or broken upon delivery, stop using the product immediately and contact Amart for assistance.

3.Inspect regularly:

If you notice that the glass is chipped or broken over its lifespan, stop using the product immediately as this may result in a sudden and premature cracking of the surface.

4.Avoid Impact:

Do not drop, drag, or strike the glass surface. Handle with care to avoid any damage.

5.Safe Usage:

Do not sit or stand on the glass surface. It is designed for use as a tabletop and is not designed to support weight.

6.Temperature Precautions:

Avoid placing very hot or very cold items directly on the glass. Use at least 6mm thick table mats or protective pads to prevent extreme temperatures from coming into direct contact with the glass.

7.Scratches:

Do not use the glass surface as a chopping board or allow it to come into contact with sharp or abrasive objects as this can cause scratches.

Cleaning:

Clean your furniture with care. Avoid using harsh solvents, abrasives, or chemicals. To remove dirt and grime, rinse with fresh water and dry thoroughly. For a deeper clean, use a sponge and a mild detergent solution as needed. Abrasive cleaners will scratch/damage the surface.

PRODUCT CARE:

Exploding glass

"Exploding glass" refers to the phenomenon where glass suddenly shatters or breaks apart, often with a lot of force or in a dramatic fashion. There are several causes for this issue:

1.Thermal Stress:

Glass can break due to rapid changes in temperature. For example, if a hot object is placed on a cold glass surface, or if the glass is exposed to extreme heat or cold, it can expand or contract unevenly, causing it to crack or shatter.

2.Impact Damage:

Dropping or striking glass with a hard object can cause it to crack or break. Even a small impact can lead to a chain reaction of fractures, making the glass appear to "explode."

3.Unlevel surface: The uneven glass surface causes uneven stress distribution, making it more prone to breakage and fragmentation under pressure or impact, posing a danger to surrounding people and objects. For example, when a person leans on a glass partition with an uneven surface, the glass may break due to excessive local stress.

4.Chemical Reactions: Some types of glass can be sensitive to certain chemicals. Exposure to harsh chemicals or cleaning agents might weaken the glass over time, leading to sudden breakage.

If glass "explodes" or shatters, it is important to handle the situation carefully to avoid injury. Broken glass should be cleaned up promptly.

When choosing protective matting for your tabletop, consider the below:

1.Material:

Choose placemats made from materials that offer good insulation against heat, such as silicone, cork, or thick fabric. The thickness of this material should be a minimum of 6mm. These materials are effective at absorbing and diffusing heat.

2.Coverage:

Ensure that the placemat is large enough to cover the area where hot items will be placed. It should completely cover the base of pots, pans, or other hot items to provide adequate protection.

3.Heat Resistance:

Verify that the placemat is designed to handle high temperatures. Some placemats are specifically rated for heat resistance and can withstand higher temperatures without damage.

By following these simple steps, you will help keep your furniture in great condition and ensure it remains a beautiful and functional part of your outdoor space.
